About this workshop

The Office of the Public Advocate has funded some key initiatives to assist people with acquired brain injury (ABI) who come in contact with the criminal justice (CJ) system.

The Building Bridges project is presenting a series of workshops throughout Victoria, across 2014-2015, designed to increase active liaison across ABI and CJ sectors.

Hands-on, direct-service workers are the target audience for these workshops: ABI service providers, mental health workers, community corrections staff, and post-release services staff are key stakeholders. The workshops will include resources for participants, involve active learning tasks, a research component, and are part of a longer-term approach of systemic change designed to benefit this client group.

This advert is for the Grampians region. To stay informed of events in other regions, please add yourself to the mailing list by following this link in your web browser <http://eepurl.com/T7TR1>

Grampians workshop - registration essential

Registration deadline: Thursday 18th June 2015
